Mentors Corner

The mentor program has been set up to answer your questions or critique your images before the meeting. If you would like help with an area of photography or videography send an email or call and I will set you up with a mentor. This way a member with the skills to help will be available to mentor you before the meeting. We hope this program will be of benefit to beginning as well as advanced photographers that are working on improving their skills. You can contact me at ljbdiver@sbcglobal.net or call 949-837-7734.

Mentors: set up mentor and time before the meeting.

Subjects of Interest

Nudibranchs

The word nudibranch originates from Latin: nudus meaning naked and Greek brankhia meaning gills. Nudibranchs (pronounced noodabranks) are mollusks in the Class Gastropoda (includes snails, slugs, limpets and seahares). They have a shell in their larval state but do not carry it into adulthood.

Nudibranchs are found in oceans all over the world. There are two main types of nudibranchs:

- dorid nudibranchs: these have a single plume of gills on one spot on the back end of their body and can be retracted inward. Usually retract if you bump the strata they are on with your camera. Then you have to sit patiently waiting for it to open.
- eolid (aeolid) nudibranchs: these have fringe like structures of gills along the back called cerata, these don't retract in. Cerata come in a variety of shapes, string like, club, clustered like fringe can be very full or very sparce. Breathing, digestion and defense are some functions of cerata.

Nudibranchs also have tentacle like appendages called rhinophores on their heads used for smelling their environment that can also be retracted inward.

There are many species and new ones are still being discovered. They range in size from one foot to a fraction of an inch. Many are brightly colored, perhaps a warning to not be eaten. I've seen fish gobble them up and then instantly spit them out. Since individual species of nudibranchs usually eat a specific food, you may easily find them grazing on their favorite food.

Nudibranchs are great macro subjects due there color and slow moving pace. Their eggs are also fascinating as some look like spaghetti and others ribbons.

CONTEST LEVELS

Contestant Levels and Advancement

1. AMATEUR

Only global changes* are allowed. This category includes members shooting an SLR camera system, with one year or less of underwater photography experience, or shooting with a point and shoot (PAS) camera. At the end of the year the first place winner/s or any member attaining 18 points shall advance to Amateur. PAS camera users who have advanced to the Amateur category and have entered images for at least 6 months, but have not accrued more than 6 points, may choose to return to the Amateur category the following year.

2. ADVANCED

Only global changes* are allowed. This category includes members having at least one year experience in underwater photography or who no longer qualify for the Amateur category. PAS camera shooters may choose, or be required, to be in this category. At the end of the first year, the first place winner/s or any member attaining at least 18 points (board confirmed) shall advance to the Open category. Members who have advanced to the Open category and have entered images for at least 6 months but have not accrued more than 6 points, may choose to return to the Advanced category the following year.

3. OPEN

Digital manipulation is allowed except for composite imaging (adding to an image). This category includes members who are considered professional or advanced underwater photographers by the OCUPS board or any member wishing to manipulate their images beyond basic global changes*. Open category members who have entered images for at least 6 months but have not accrued more than 6 points may choose to return to the Advanced category the following year.

*Definition of Global Modification: Changes that affect the entire images, such as cropping, saturation, white balance, levels, sharpening, and contrast. Prohibited modifications would include the use of layers or other tools that are applied to a specific area i.e. brushes, healing, cloning, etc. Contestants may enter images for only one still category in a given year. However, the video category is separate and may be entered independent of the still category. Member eligibility for a category will be determined at the first of the year or when joining the club. Members may choose to move up a category, but not down, during the year, forfeiting all previous points accumulated.

Photographers taking photos with both PAS and SLR cameras will be classified as an SLR photographer. PAS photographers are not restricted to the Amateur category. The OCUPS board may review eligibility qualifications and request a member to change their category.

Fee: Please contribute \$2 per slide up to 2 slides and \$5 for 3 slides entered.... this money goes to help pay for the awesome trophies and plaques at the end of the year. We, however, do not need any money to improve the Perpetual Trophy for Flooding, it is a gem just the way it is!
